- 美國大選結果是11月推動市場表現的主要因素。
  共和黨在國會兩院和總統選舉中的勝利提高了
  人們對即將上任的政府政策將加强經濟和市場
  的預期。對進一步减税、擴張性財政措施和貿易關税的預期推動了美國股市上漲。
- 唐納德·特朗普最近宣布計劃從2025年1月起對 來自中國、墨西哥和加拿大的進口商品徵收關 税。如果實施這些關税,可能會提高這些國家 的商品價格,進一步推高通脹。然而,美聯儲 是否會以更小且更慢的降息幅度應對這種價格

壓力仍然存在不確定。目前市場情緒表明,美聯 儲12月會議將降息25個基點的概率仍高於維持利 率不變的情形。

 在中國,政策制定者正試圖穩定陷入困境的房地 產市場,這對國內需求造成了壓力。儘管中國製 造業因訂單疲軟和生產者價格下跌而面臨挑戰, 但10月出口飈升,主要原因是爲應對可能來自美 國和歐盟的關税上調,工廠加快發貨。最近的數 據表明,這些努力可能會在短期內改善情緒。

## Monthly Investment Insights

December 2024

- The U.S. election results were a major factor in driving market performance in November. The Republican victory in both chambers of Congress and the presidency raised expectations that the incoming administration's policies would strengthen the economy and markets. Anticipation of further tax cuts, expansionary fiscal measures, and a nationalist trade agenda pushed U.S. equity markets higher.
- President-elect Donald Trump recently announced plans to impose tariffs on imports from China, Mexico, and Canada in January 2025. These tariffs, if enacted, could increase the prices of goods from these countries, potentially lifting inflation further. However, it remains uncertain whether the Federal Reserve would respond to such price pressures with smaller/slower interest rate cuts. Market sentiment currently suggests a slight edge towarda 25 basis point rate cut over holding rates steady for the Fed's December meeting.
- In China, policymakers are attempting to stabilize the struggling property market, which has weighed on domestic demand. While China's manufacturing sector has faced challenges due to weak orders and falling producer prices, October exports surged as factories rushed shipments ahead of potential tariff increases from the U.S. and EU. Recent data suggests these efforts may improve sentiment in the near term.

Underweight Overweight

### Fixed income:

Maintain Neutral position: Expected Fed rate cuts should lead to lower yields. However, Trump's policy shifts like tariffs, tax cuts, or fiscal expansion could pose upside risk to bond yields.

### Investment Grade Credit (IG)

Maintain Underweight Position: Credit spreads are near record lows, and while some widening is expected, a major credit crisis is unlikely.

#### Asia Ex-Japan Equities: Shifted from Overweight to Neutral Position

- Domestic growth and inflation in many Asian economies remain stable, but external factors like the strong dollar and potential trade tariffs pose significant risks.
- China continues to implement supportive policies, but the outlook for external demand remains uncertain due to Trump's victory. Offshore Chinese equity outflows are also pressuring the market.

Global Equities: Maintain Overweight Position

- Strong fundamentals, including solid EPS growth, potential Fed rate cuts and upside to GDP growth, support a modestly overweightposition.
- US economy is expected to grow above potential levels, and president-elect Trump's policies could further boost 2025 growth. Near-term recession risks have diminished with a likely tilt to fiscal easing.
