AIA Investment Management & Trust Corporation Philippines	HSBC	Isla Lipana	

*as a percentage of average daily NAV for the quarter valued at Php 177,428,045.73

INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve higher income and capital growth by investing in Philippine government bonds with an average portfolio duration of greater than five (5). The Fund will track the performance of the Markit iBoxx ALBI Philippines 5+ Total Return Index or IBXXPHP5 Index by replicating the characteristics of the benchmark.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

This Fund is suited for moderately aggressive investors with an investment horizon of more than five (5).

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Credit Risk.** Refers to the risk of losses that an investor is exposed to due to a borrower’s failure to pay the principal and/or interest on instruments such as bonds, loans, or other forms of securities. The borrower’s inability to fulfil its financial obligations may be due to adverse changes in its financial condition thus, lowering the credit quality and/or price of the security.
- Counterparty Risk.** Refers to the risk of a counterparty defaulting on a contract to deliver its obligation in cash, securities or even services.
- Liquidity Risk.** Refers to the risk of losses that an investor is exposed to due to the inability to convert assets into cash immediately or when the conversion is possible but only at a lower price. Such may be caused by holding securities with small or few outstanding issues, inadequate buyers, infrequent trading activity or underdeveloped capital market.
- Market Risk.** Refers to the risk of losses that an investor is exposed to due to the unanticipated change in the prices of securities or macroeconomic variables that influence the financial markets.
- Interest Rate Risk.** Refers to the risk of loss that an investor is exposed to due to changes in interest rates. The purchase and sale of fixed income securities, for example, may result in a loss because the price of the security may decline if interest rates rise.
- Reinvestment Risk.** Refers to the risk that an investor is exposed to the possibility of getting lower returns or earnings upon reinvestment of maturing funds and/or interest earnings.

- THE UITF IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP (PDIC).
- RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY.
- WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.
- THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

NAVPU GRAPH

* Effective May 01, 2024 - new benchmark is Markit iBoxx ALBI Philippines Index 5+ [IBXXPHP5 INDEX] from Bloomberg Philippine Local Sovereign Index [BPHIL INDEX]. The IBXXPHP5 Index reflects acceptable returns on a peso-denominated medium risk long-term fixed income portfolio comprising of Philippine Government bonds with remaining tenors of at least five (5) years. Benchmark composition is rebalanced monthly. Relative to the previous benchmark, the returns are net of taxes, which is a more accurate measure of performance.

OUTLOOK AND STRATEGY

In Q4 2025, the Bangko Sentral ng Pilipinas (BSP) deepened its easing cycle as growth weakened, and inflation remained firmly below target.

Headline inflation averaged about 1.6% during the quarter, extending its run below the BSP's 2–4% target, driven largely by softer food prices, particularly rice. Growth momentum slowed materially, with GDP expanding by 4.0% year on year in Q3, the weakest pace outside the pandemic since 2011, reflecting weak investment, softer consumption, and lower government spending. Against this backdrop, the BSP delivered two 25 basis point rate cuts, lowering the policy rate to 4.50% and reinforcing its shift to an accommodative stance. While the central bank described the December cut as an insurance move and signalled that the easing cycle may be approaching its later stage, subdued inflation and lingering growth risks continue to justify a supportive policy bias.

Peso bond yields mostly fell across the curve with benchmark rates closing at:

- 5.37% for the 2-year (-19 bps),
- 5.79% for the 5-year (-8 bps),
- 6.07% for the 10-year (+4 bps), and
- 6.41% for the 20-year (-2 bps).

The BSP is nearing the end of its easing cycle, with any further moves likely gradual and data dependent. Inflation may firm modestly as base effects fade but should remain within the 2–4% target range, supporting bonds despite near-term volatility from peso weakness and global policy uncertainty. The fund will maintain flexibility, holding higher liquidity early in the year and redeploying as conditions improve.

³ Returns are net of fees.

⁴ Duration measures the expected change in the portfolio's bond prices to a 1% change in interest rates.

⁵ Volatility measures the degree to which the Fund fluctuates vis-à-vis its own average return over a period of time (standard deviation of returns).

⁶ Tracking Error is the volatility of the returns of the Fund over and below the returns of its corresponding benchmark (BPHIL INDEX from inception to April 30, 2024 and IBXXPHP5 Index from May 01, 2024) (standard deviation of excess returns of the Fund vis-a-vis its benchmark). The lower the Tracking Error, the closer the Fund's composition is vis-à-vis its benchmark. A Tracking Error equal to 0% means the Fund is fully replicated to its benchmark.
