INVESTMENT OBJECTIVE AND STRATEGY

The fund aims to achieve capital growth by investing predominantly in Philippine Stock Exchange listed-companies that comply with AIA Group’s exclusion policy on coal, tobacco and ammunitions. The fund aims to outperform the total return of Philippine Stock Exchange Index or PCOMP Index.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest. This fund is suited for aggressive investors with an investment horizon of greater than 10 years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- **Credit Risk.** Refers to the risk of losses that an investor is exposed to due to a borrower’s failure to pay the principal and/or interest on instruments such as bonds, loans, or other forms of securities. The borrower’s inability to fulfil its financial obligations may be due to adverse changes in its financial condition thus, lowering the credit quality and/or price of the security.
- **Counterparty Risk.** Refers to the risk of a counterparty defaulting on a contract to deliver its obligation in cash, securities or even services.
- **Liquidity Risk.** Refers to the risk of losses that an investor is exposed to due to the inability to convert assets into cash immediately or when the conversion is possible but only at a lower price. Such may be caused by holding securities with small or few outstanding issues, inadequate buyers, infrequent trading activity or underdeveloped capital market.
- **Market Risk.** Refers to the risk of losses that an investor is exposed to due to the unanticipated change in the prices of securities or macroeconomic variables that influence the financial markets.
- **Price Risk.** Refers to the risk of losses that an investor is exposed to due to the unanticipated change in the prices of securities. Such change may be associated with the issuers of the securities or sectors or industries within which the issuers operate.
- **Transition Risk.** Refers to the risk of the potential economic adjustment cost borne by investee companies resulting from policy, legal, technology and market changes to meet AIA Group’s exclusion policy on coal, tobacco and ammunitions. This risk also includes the protracted appreciation by the investing public as manifested through an improvement in relative valuation of the efforts of investee companies.
- **Greenwashing Risk.** Refers to the risk of the potential to be misled or overly convinced by the investee companies’ or product issuers’ declaration of efforts to attain net zero commitments, sustainability of product offerings or their transition plans leading to an over appropriation of capital relative to the true effort. This can result from the urgent demand for ESG products, scoring or assessment modeling errors, reliance on third parties and/or outright misdeclaration of investee companies or product providers.
- **Portfolio Construction Related Risk.** Refers to the risk of the derivative result of attaining sub-optimal portfolio characteristics in the implementation of the AIA Group’s exclusion policy on coal, tobacco and ammunitions. Such risk involves compromises in market liquidity, sector representation, short-term tactical performance and concentration issues among others.

- THE UITF IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP (PDIC).
- RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY.
- WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.

OUTLOOK AND STRATEGY

The PSEi bounced back to positive territory in 2Q2025 due to softer-than-expected inflation, dovish signals from the BSP and tempered repercussions from US tariff announcements. Quarter-on-quarter, PSEi rose by 3% to 6,364.94.

- Falling food prices led inflation (March 1.8%, April 1.4%, May 1.3%) print to be at the low-end of BSP's target range.
- BSP resumed easing cycle with 2x 25bps rate cut during the quarter and guided for 25-50bps more cut for the balance of the year.
- Due to relative resilience of Philippines to global trade war, JP Morgan upgraded their call on local equities to Overweight.

While the NAVPU rose by 3.29%, this underperformed benchmark by 85bps. The main drivers of the underperformance were the Fund's overweight position in Consumer Discretionary and Communication Services sectors.

We expect the market to be continuously volatile as it assesses the impact of the new trade policies announced by US President Trump. The Philippines was slapped with a 20% tariff, though negotiable until August 1, that is higher than the 17% announced on April 1 Liberation Day. We have tilted the portfolios to defensive names to better withstand the expected volatility ahead.
