In order to achieve its investment objective, the Sub-Fund will invest primarily, i.e. at least 50% of the Sub-Fund's Net Asset Value, in USD-denominated fixed or floating rate fixed income securities issued by government, agencies and companies globally. The Sub-Fund may invest in a full spectrum of fixed income securities including corporate bonds, emerging markets debt instruments, collateralized loan obligations (CLOs), asset backed securities (ABS), commercial MBS (CMBS), taxable municipals, US government or agency obligations, as well as cash and commercial paper. The Sub-Fund can invest in securities issued by issuers domiciled outside of the US as long as they are denominated in USD. The Sub-Fund will primarily invest in securities rated investment grade (BBB- or above rated by Standard & Poor's, Baa3 or above by Moody's and BBB- or above by Fitch or an equivalent rating from an internationally recognised rating agency) and non-investment grade securities shall not exceed 20% of the net assets of the Sub-Fund. The Sub-Fund will not invest in distressed or default securities (rated CCC+ (or equivalent) or below).

Policy: The Sub-Fund may use financial derivative instruments for hedging and efficient portfolio management purposes only. The Sub-Fund will not enter into (i) repurchase and reverse repurchase transactions, (ii) securities lending and securities borrowings, and (iii) total return swaps. The Sub-Fund may hold ancillary liquid assets. On a temporary basis, the Sub-Fund may, in order to take measures to mitigate risks relative to such exceptional market conditions in the best interests of the investors, hold ancillary liquid assets up to 100% of its Net Asset Value.

In order to (i) achieve its investment goals, (ii) for treasury purposes, and/or (iii) in case of unfavourable market conditions, the Sub-Fund may hold cash equivalent (i.e., bank deposits excluding bank deposits at sight, money market instruments or money market funds) pursuant to the applicable investment restrictions. Risk and Reward Profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time.

The lowest category does not mean a risk free investment.

The Sub-Fund is rated in this risk and reward category due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Sub-Fund to financial loss.

Credit risk: The risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the sub-fund holds low-rated, non-investment-grade securities.

Derivatives Instruments: Derivatives and other financial techniques used substantially to obtain, increase or reduce exposure to assets may be difficult to value, may generate leverage, and may not yield the anticipated results.

All of this could be detrimental to the performance of the Sub-Fund.

Hedging risk: The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their shares.

Fixed Income Transferable Securities: Debt securities are subject to both actual and perceived measures of creditworthiness. The "downgrading" of a rated debt security or its issuer or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security.

Interest Rate Risk: The performance of a Sub-Fund may be influenced by changes in the general level of interest rates

Bond Downgrade Risk: A Sub-Fund may invest in highly rated / investment grade bonds, however, where a bond is subsequently downgraded it may continue to be held in order to avoid a distressed sale. To the extent that a Sub-Fund does hold such downgraded bonds, there will be an increased risk of default.

Investment grade bonds risk: Certain Sub-Funds' investment objective is to invest in investment grade bonds where there is a risk that the rating of the bonds held by the Sub-Funds may be downgraded at any time. In the event of such downgrading, the value of the Sub-Funds may be adversely affected.

ABS/MBS Risk: The Sub-Fund may invest in asset-backed securities ("ABS"), including mortgage-backed securities ("MBS"), which are debt securities based on a pool of assets or collateralised by the cash flows from a specific pool of underlying assets. ABS and MBS assets may be highly illiquid, and therefore prone to substantial price volatility.
