## AIA SINGAPORE BOND FUND

For Institutional Investors only\*.  
This document is not for retail investors. Please do not redistribute.

### INVESTMENT OBJECTIVE and POLICY

The Sub-Fund aims to generate stable income with capital preservation by investing primarily in high credit quality fixed income securities denominated in SGD. In order to achieve its investment objective, the Sub-Fund will invest primarily, i.e. at least 50% of the Sub-Fund's Net Asset Value, in high credit quality SGD-denominated fixed or floating rate fixed income securities issued by Singapore and non-Singapore entities.

### PERFORMANCE

Return (%)

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown is not guaranteed and may change over time. The lowest category does not mean a risk free investment. The Sub-Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

#### MAIN RISKS

**Country Specific Risk** Certain Sub-Funds may invest in securities of one country or a limited number of countries. Sub-Funds that invest in one or a few select countries will be exposed to market, currency, and other risks related specifically to the economies of those countries. Government or regulators, implementation of policies, suspension or limitations on trading in any security traded on the relevant exchange, and capital flows could negatively impact the Sub-Funds' performance. Country specific issues could magnify the negative performance of the Sub-Funds or adversely impact the positive performance. Such Sub-Funds may be subject to volatility and structural risks associated with specific countries, and performance may lag the performance of Sub-Funds that invest in a diversified portfolio across many countries. Exposure to one or a limited number of countries' markets, also increases the potential volatility of such Sub-Funds due to the increased country or regional concentration risk as they are less diversified compared to exposure to specific more developed regional or global markets.

**Credit Risk** The risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, non-investment-grade securities.

**Interest Rate Risk** The performance of a Sub-Fund may be influenced by changes in the general level of interest rates.

**Liquidity Risk** In difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.

Distributions are not guaranteed and may fluctuate. Past distributions are not necessarily indicative of future trends, which may be lower. Distribution payouts and its frequency are determined by the Board of Directors and should not be confused with the Fund's performance, rate of return or yield. Any payment of distributions may result in an immediate decrease in the net asset value per share. Please refer to Section 7.2 of the prospectus for dividend distribution policy.

For more information about charges, please see section 9 (fees and expenses) of the prospectus, which is available at : [www.aia.com/en/funds-information](http://www.aia.com/en/funds-information)

## COMMENTARY

The Global economy continued to hold up well during the back-and-forth headlines around the prospects of a U.S.–Iran peace deal. The global manufacturing Purchasing Managers' Index (PMI) reached 52.6 in May, holding at its strongest level in recent years. Artificial intelligence (AI)-related demand drove the sharpest PMI gains in key producer markets such as South Korea, Taiwan and the U.S., while temporary Middle East conflict-related factors, including firms front-loading inputs and longer supplier delivery times, provided an additional boost. Meanwhile, the global services PMI printed a notch below its pre-conflict level but remained firmly in expansionary territory at 51.3 for May.

In the U.S., stronger-than-expected April inflation and labour market data, together with renewed geopolitical concerns and higher energy prices, pushed U.S. Treasury (UST) yields out of their recent ranges to year-to-date highs by mid-May. A more hawkish Federal Reserve (Fed) tone and rising market pricing of future rate hikes, including a full 25 basis points (bps) hike by spring 2027, drove a broad bear flattening of the UST curve, first in nominal yields and then in Treasury Inflation-Protected Securities (TIPS). However, optimism over a potential resolution to the Middle East conflict helped rates gradually decline toward month-end.

In China, the economy remains K-shaped, with exports and manufacturing continuing to drive growth while domestic consumption stays subdued. April activity data were broadly disappointing, including retail sales, fixed asset investment and credit growth, but expectations are for authorities to respond with further fiscal support, as in previous slowdowns. Although higher energy prices have lifted Producer Price Index (PPI), demand-driven inflation is likely to remain muted for an extended period, given weak wage growth and the one to two years likely needed to absorb property inventories. Finally, Beijing's continued push for RMB internationalisation should support a structural bias toward CNY appreciation.

In Europe, rates markets were volatile in May, driven by Middle East headlines and spillovers from moves in USTs. Rate-hike expectations moderated slightly, although investors continued to price between two and three European Central Bank (ECB) hikes in 2026. The BTP-Bund spread narrowed early in the month and remained relatively tight. In the U.K., gilts outperformed other major markets in the second half of May, supported by softer inflation and labour market data, as well as easing fiscal concerns after Andy Burnham indicated that he would maintain the current fiscal rules if he became Prime Minister.

May 2026 was broadly supportive for risk assets as U.S.–Iran peace-deal optimism drove oil prices sharply lower and helped most global government bonds rally, but U.S. Treasuries underperformed led by the front end, with the 2-year yield up 14 bps to 4.00%, the 10-year up 6 bps to 4.44% and the 30-year up 1 bp to 4.97%. The AIA Singapore Bond Fund returned 0.66% in May, representing a 2 bps outperformance of the benchmark. The outperformance can primarily be attributed to credit as spreads tightened further on hopes of a resolution in the Middle East conflict, partially offset by the Singapore Government and Statutory Board segments where yields were lower month on month and the Fund was underweight versus the benchmark. Despite the ongoing volatility from U.S. policy uncertainty and the U.S.–Iran conflict, the Fund's overweight in corporates remains supported by attractive carry and favourable technicals, helping to preserve its longer-term return profile.

## DISCLAIMER

\*This document is exclusively for use by **Institutional Investors** as defined under Luxembourg laws and regulations and the Securities and Futures Act 2001 and is not to be used with or distributed directly or indirectly to the public and must not be reproduced, extracted or circulated without prior permission.

AIA Investment Funds (“**AIAIF**”) is an open-ended investment company with variable capital registered in the Grand Duchy of Luxembourg, which qualifies as an Undertaking for Collective in Transferable Securities under relevant EU legislation. The management company of AIAIF is FundRock Management Company S.A.. AIAIF may not be registered in every jurisdiction and this document and any related materials may not be distributed or published in any jurisdiction where it would be contrary to local law or regulation.

This document is for information only and is not intended as an offer, a solicitation of offer or a recommendation, to deal in shares of securities or any financial instruments nor does it constitute any investment advice to anyone as it does not have regard to any specific investment objective, financial situation or particular needs. Subscriptions for shares of AIAIF can only be made on the basis of its current Prospectus and the Key Investor Information Document (“**KIID**”) of the relevant sub-fund.

Investments in AIAIF are not obligations of, deposits in, guaranteed or insured by AIAIF nor any of its affiliates and are subject to investment risks, including the possible loss of the principal amount invested. **Prospective investors are invited to further consider the risk warnings section of the Prospectus and the relevant KIID.** This document is solely for information and does not have any regard to the specific investment objectives, financial or tax situation and the particular needs of any specific person who may receive this document. No investment strategy or risk management strategy techniques can guarantee returns or eliminate risks in any market environment.

Please refer to the offering documents (including, but not limited to the current Prospectus and the KIID) of AIAIF for details on fees and charges, dealing & redemption, product features, risk factors and seek professional advice before making any investment decision. The value of shares in any sub-fund of AIAIF and the income accruing to the shares, if any, may fall or rise. Where an investment is denominated in a currency other than the base currency of a sub-fund of AIAIF, exchange rates may have an adverse effect on the value price or income of that investment. Investors should not make any investment decision solely based on this document. In the event that an investor may choose not to seek advice from a financial adviser, the latter should consider carefully whether an investment into a sub-fund of AIAIF in question is suitable for him.

**Past performance and the predictions, projections, or forecasts on the economy, securities markets or the economic trends of the markets are not necessarily indicative of the future or likely performance of the AIAIF.**

**Any sub-fund of AIAIF may use or invest in financial derivative instruments for efficient portfolio management and hedging purposes.**

**This paragraph is only applicable to the distribution share classes of AIAIF.** AIAIF may, at its discretion, determine how the earnings of distribution share classes shall be distributed and may declare distributions from time to time. When AIAIF decides to pay dividends in respect of a distributing share class out of the capital of the sub-fund of AIAIF or where the dividends in respect of a distributing share class are paid out of gross income of the sub-fund of AIAIF, while the sub-fund of AIAIF's fees and expenses are charged to or paid out of the capital of the sub-fund of AIAIF, resulting in an increase in distributable income for the payment of dividends by the sub-fund of AIAIF, such payment of dividends may, in the light of the rules applicable in the jurisdictions where the sub-fund of AIAIF is registered for public distribution, be considered as a payment of dividends out of and effectively out of capital respectively, both of which would amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. The distributions, including amounts and frequency, are not guaranteed and are subject to the discretion of AIAIF. Past dividends are not a forecast or projection of future distributions.
