

AIA INVESTMENT FUNDS

AIA SINGAPORE BOND FUND

For Institutional Investors only*.
This document is not for retail investors. Please do not redistribute.

INVESTMENT OBJECTIVE and POLICY

The Sub-Fund aims to generate stable income with capital preservation by investing primarily in high credit quality fixed income securities denominated in SGD. In order to achieve its investment objective, the Sub-Fund will invest primarily, i.e. at least 50% of the Sub-Fund's Net Asset Value, in high credit quality SGD-denominated fixed or floating rate fixed income securities issued by Singapore and non-Singapore entities.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown is not guaranteed and may change over time. The lowest category does not mean a risk free investment. The Sub-Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

MAIN RISKS

Country Specific Risk Certain Sub-Funds may invest in securities of one country or a limited number of countries. Sub-Funds that invest in one or a few select countries will be exposed to market, currency, and other risks related specifically to the economies of those countries. Government or regulators, implementation of policies, suspension or limitations on trading in any security traded on the relevant exchange, and capital flows could negatively impact the Sub-Funds' performance. Country specific issues could magnify the negative performance of the Sub-Funds or adversely impact the positive performance. Such Sub-Funds may be subject to volatility and structural risks associated with specific countries, and performance may lag the performance of Sub-Funds that invest in a diversified portfolio across many countries. Exposure to one or a limited number of countries' markets, also increases the potential volatility of such Sub-Funds due to the increased country or regional concentration risk as they are less diversified compared to exposure to specific more developed regional or global markets.

Credit Risk The risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, non-investment-grade securities.

Interest Rate Risk The performance of a Sub-Fund may be influenced by changes in the general level of interest rates.

Liquidity Risk In difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.

COMMENTARY

The global composite Purchasing Managers' Index (PMI) remained firmly in expansionary territory in December, although it declined by 0.7 points to 52.0 from the previous month. The Services sector continued to outperform Manufacturing, consistent with performance trends observed in recent years. Disinflation remains on track across developed markets and, more notably, emerging markets, reflecting still-restrictive financial conditions and the spillover of China's industrial excess capacity. In Asia, economic growth is expected to be increasingly supported by domestic demand, underpinned by sufficient monetary and fiscal policy measures.

The United States Treasury yield curve steepened modestly over December, driven by higher long-end yields, while the front end remained relatively range-bound. Short-dated rates fully reflected expectations of the Federal Reserve's (Fed) third consecutive 25 basis points (bps) rate cut at the December Federal Open Market Committee (FOMC) meeting, alongside the release of much-anticipated economic data, including third-quarter 2025 Gross Domestic Product (GDP), November Consumer Price Index (CPI) inflation, and delayed October and November employment data following the extended government shutdown. Separately, the Fed commenced open-market purchases of Treasury bills from 1 December, described as reserve management purchases in response to evolving liquidity conditions rather than as a monetary policy tool aimed at lowering longer-dated interest rates.

In China, the full-year 2025 real GDP growth target of "around 5%" remains achievable; however, growth is expected to moderate to a range of 4.5% to 5.0% in 2026, to be announced at the National People's Congress meeting in March. The 15th Five-Year Plan outline, released in October, signalled the government's intention to shift toward more balanced growth through increased household consumption. Fiscal policy is expected to remain the primary support, although there is limited capacity for the People's Bank of China to cut rates further as it seeks to preserve bank profitability. Reflecting weak wage growth and the time required to absorb property market inventories, the GDP deflator is expected to remain negative through 2026 before turning mildly positive from 2027, despite ongoing policy efforts to address industrial overcapacity.

Across Europe, economic outcomes for 2026 are expected to remain mixed, characterised by trend-like growth alongside materially lower inflation. Germany's planned fiscal stimulus is expected to provide a meaningful boost, offsetting contractionary policies elsewhere, while lower energy prices, potentially supported by a ceasefire in Ukraine, could further support consumption. In December, the European Central Bank (ECB) held its policy rate at 2.0% for the fourth consecutive meeting, in line with expectations, and upward revisions to growth forecasts reinforced market expectations for rates to remain on hold in 2026. In the United Kingdom, an unexpectedly sharp decline in November inflation and weaker labour market data enabled the Bank of England (BoE) to proceed with another 25-bps rate cut at its December meeting. Although the Autumn Budget announced increased fiscal headroom and lower long-dated gilt issuance toward the end of November, the United Kingdom continues to face notable fiscal challenges in 2026.

On a month-on-month basis, United States Treasury two-year yields declined by 2 bps, while five-year, 10-year, and 30-year yields increased by 13 bps, 15 bps, and 18 bps, respectively. Long-dated United States bonds underperformed those of the United Kingdom and Germany but outperformed Australia during the month, reflecting a hawkish market repricing of potential rate hikes in Australia compared with ongoing monetary easing paths in the United States and the United Kingdom.

The AIA Singapore Bond Fund returned -0.44% in December, outperforming the benchmark by 0.10%. Performance was driven primarily by positive allocation effects within the Corporates segment, partially offset by negative security selection effects in the government bond segment, as Singapore Government Securities yields rose and the yield curve steepened during the month. As at the end of December, the Fund continued to maintain an overweight position in duration and corporate bonds relative to the benchmark.

DISCLAIMER

*This document is exclusively for use by **Institutional Investors** as defined under Luxembourg laws and regulations and the Securities and Futures Act 2001 and is not to be used with or distributed directly or indirectly to the public and must not be reproduced, extracted or circulated without prior permission.

AIA Investment Funds ("**AIAIF**") is an open-ended investment company with variable capital registered in the Grand Duchy of Luxembourg, which qualifies as an Undertaking for Collective in Transferable Securities under relevant EU legislation. The management company of AIAIF is FundRock Management Company S.A.. AIAIF may not be registered in every jurisdiction and this document and any related materials may not be distributed or published in any jurisdiction where it would be contrary to local law or regulation.

This document is for information only and is not intended as an offer, a solicitation of offer or a recommendation, to deal in shares of securities or any financial instruments nor does it constitute any investment advice to anyone as it does not have regard to any specific investment objective, financial situation or particular needs. Subscriptions for shares of AIAIF can only be made on the basis of its current Prospectus and the Key Investor Information Document ("**KIID**") of the relevant sub-fund.

Investments in AIAIF are not obligations of, deposits in, guaranteed or insured by AIAIF nor any of its affiliates and are subject to investment risks, including the possible loss of the principal amount invested. **Prospective investors are invited to further consider the risk warnings section of the Prospectus and the relevant KIID.** This document is solely for information and does not have any regard to the specific investment objectives, financial or tax situation and the particular needs of any specific person who may receive this document. No investment strategy or risk management strategy techniques can guarantee returns or eliminate risks in any market environment.

Please refer to the offering documents (including, but not limited to the current Prospectus and the KIID) of AIAIF for details on fees and charges, dealing & redemption, product features, risk factors and seek professional advice before making any investment decision. The value of shares in any sub-fund of AIAIF and the income accruing to the shares, if any, may fall or rise. Where an investment is denominated in a currency other than the base currency of a sub-fund of AIAIF, exchange rates may have an adverse effect on the value price or income of that investment. Investors should not make any investment decision solely based on this document. In the event that an investor may choose not to seek advice from a financial adviser, the latter should consider carefully whether an investment into a sub-fund of AIAIF in question is suitable for him.

Past performance and the predictions, projections, or forecasts on the economy, securities markets or the economic trends of the markets are not necessarily indicative of the future or likely performance of the AIAIF.

Any sub-fund of AIAIF may use or invest in financial derivative instruments for efficient portfolio management and hedging purposes.

This paragraph is only applicable to the distribution share classes of AIAIF. AIAIF may, at its discretion, determine how the earnings of distribution share classes shall be distributed and may declare distributions from time to time. When AIAIF decides to pay dividends in respect of a distributing share class out of the capital of the sub-fund of AIAIF or where the dividends in respect of a distributing share class are paid out of gross income of the sub-fund of AIAIF, while the sub-fund of AIAIF's fees and expenses are charged to or paid out of the capital of the sub-fund of AIAIF, resulting in an increase in distributable income for the payment of dividends by the sub-fund of AIAIF, such payment of dividends may, in the light of the rules applicable in the jurisdictions where the sub-fund of AIAIF is registered for public distribution, be considered as a payment of dividends out of and effectively out of capital respectively, both of which would amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. The distributions, including amounts and frequency, are not guaranteed and are subject to the discretion of AIAIF. Past dividends are not a forecast or projection of future distributions.

There is no assurance that any securities discussed herein will remain in the portfolio in the future.
