AIA US High Yield Bond Fund a sub-fund of AIA Investment Funds

The Fund is managed by FundRock Management Company S.A. (the "Management Company")

Objectives and Investment Policy

Objective: The Sub-Fund aims to maximise long-term total return, consistent with preservation of capital and prudent investment management by investing in a diversified fixed income portfolio consisting primarily of high yield securities denominated in USD. The Sub-Fund will invest primarily, i.e. at least 50% of the Sub-Fund's Net Asset Value, in a diversified portfolio of high yield fixed income securities that are rated lower than Baa3 by Moody's, or lower than BBB- by S&P or equivalently rated by Fitch. In normal market conditions, the Sub-Fund may be invested up to 30% of its Net Asset Value in high yield fixed income securities rated Caa1 or lower by Moody's or CCC+ or lower by S&P or equivalently rated by Fitch (or, if unrated, determined by the Sub-Investment Manager to be of comparable quality).

The portion of the Sub-Fund's Net Asset Value that are not invested in fixed income securities rated lower than Baa3 by Moody's, or lower than BBB- by S&P or equivalently rated by Fitch may be invested in higher quality fixed income securities up to a maximum of 20% of the Sub-Fund's Net Asset Value. The Sub-Fund will not invest more than 10% of its Net Asset Value in distressed securities. The Sub-Fund will not invest more than 3% of its Net Asset Value in fixed income securities rated Ca1 or lower by Moody's or CC+ or lower by S&P or equivalently rated by Fitch. In case of a downgrade of a security to distressed, as defined above, or default, the Sub-Fund's Investment Manager may (i) sell a part or the entire amount of security held or (ii) terminate the transaction entered into, at its discretion. The Sub-Fund may invest without limit in USD denominated securities of non-U.S. issuers. The total market value of securities of a single corporate issuer shall not exceed 5% of the Sub-Fund's Net Asset Value. The value of securities of a single issuer shall not exceed 10% of the total outstanding debt of such issuer. The Sub-Fund may invest in up to 5% of its Net Asset Value in call deposits. The Sub-Fund may also hold securities offered outside the United States of America without registration under the United States Securities Act of 1933.

The Sub-Fund may also retain amounts in cash or cash equivalents.

The Sub-Fund will not enter into (i) repurchase and reverse repurchase transactions, (ii) securities lending and securities borrowings, and (iii) total return swaps. The Sub-Fund may hold ancillary liquid assets. On a temporary basis, for a period of time strictly necessary, and if justified by exceptionally unfavourable market conditions, the Sub-Fund may, in order to take measures to mitigate risks relative to such exceptional market conditions in the best interests of the investors, hold ancillary liquid assets up to 100% of its net assets. The Sub-Fund may not invest in securities from an issuer in the tobacco industry or firms involved in the production of cluster munitions. The Sub-Fund shall further not directly hold or acquire securities from issuers which are coal mining and / or coal-fired power generation companies.

Risk and Reward Profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time.

The lowest category does not mean a risk free investment.

The Sub-Fund is rated in this risk and reward category due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

Liquidity Risk: In difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.

Credit risk: The risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the sub-fund holds low-rated, non-investment-grade securities.

Fixed Income Transferable Securities: Debt securities are subject to both actual and perceived measures of creditworthiness. The "downgrading" of a rated debt security or its issuer or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security.

Distressed debt securities: A Sub-Fund may invest in distressed debt securities. These assets involve a high risk of capital loss, uncertainty of interest payments and can suffer from poor liquidity.

Interest Rate Risk: The performance of a Sub-Fund may be influenced by changes in the general level of interest rates.

Bond Downgrade Risk: A Sub-Fund may invest in highly rated / investment grade bonds, however, where a bond is subsequently downgraded it may continue to be held in order to avoid a distressed sale. To the extent that a Sub-Fund does hold such downgraded bonds, there will be an increased risk of default.

Risks associated with Depositary Receipts: ADRs and GDRs do not always perform in line with the underlying security and there is no guarantee that a similar outcome will be achieved to that if it were possible to hold the securities directly. In the event of the suspension or closure of a market(s) on which the underlying securities are traded, there is a risk that the value of the ADR/GDR will not closely reflect the value of the relevant underlying securities. Additionally, there may be some circumstances where the Investment Manager cannot, or it is not appropriate to, invest in an ADR or GDR, or the characteristics of the ADR or GDR do not exactly reflect the underlying security.
