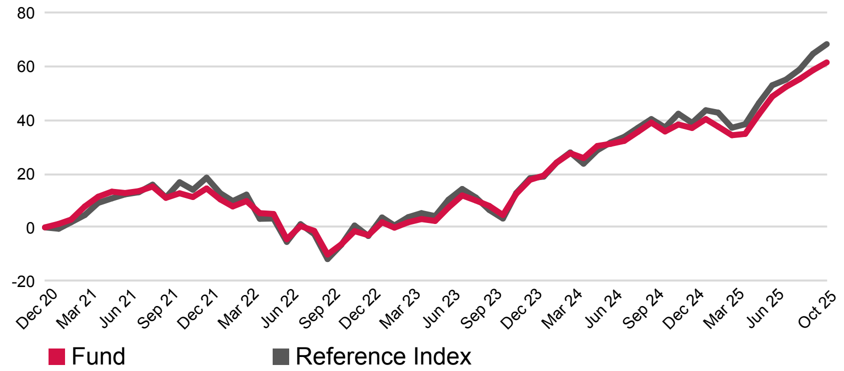
INVESTMENT OBJECTIVE and POLICY

The Sub-Fund aims to provide income through a portfolio of global equities and equity-related securities with a covered call strategy to enhance income generation. In order to achieve its investment objective, the Sub-Fund will invest primarily, i.e. at least 50% of the Sub-Fund's Net Asset Value, in equity securities and equity-related securities issued by companies globally selected for their income and / or growth potential and call options writing.

The Sub-Fund described herein is indexed to an MSCI index.

PERFORMANCE

Return (%)



Lower risk						Higher risk
typically lower rewards						typically higher rewards
1	2	3	4	5	**6**	7

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.
The risk and reward category shown is not guaranteed and may change over time.
The lowest category does not mean a risk free investment.
The Sub-Fund is rated 6 due to the nature of its investments which include the risks listed below.
These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

MAIN RISKS

Derivatives Risk The Sub-Funds may invest in derivatives, which will be subject to risks. While the judicious use of derivatives by professional investment managers can be beneficial, derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Although the Sub-Funds use derivatives only for the purposes of efficient portfolio management and/or to protect their assets and commitments, in adverse market situations, a Sub-Fund's use of derivatives may become less or wholly ineffective in such circumstances, and the Sub-Funds could suffer significant losses. The leverage element of a "FDI" can result in a loss significantly greater than the amount invested in the FDI by the Sub-Funds. Some of the risks associated with derivatives are market risk, management risk, credit risk, counterparty risk, liquidity risk, valuation risk, volatility risk, over-the-counter ("OTC") transaction risk, operational risk and leverage risk. Derivatives carry a high degree of risk and should only be considered by investors who understand such risk.

Emerging Markets Risk Emerging markets or less developed countries may face more economic, political or structural challenges than developed countries. This may mean your money is at greater risk. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Sub-Fund.

Equity Risk The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

Market Risk Market risk is understood as the risk of loss for a Sub-Fund resulting from fluctuation in the market value of positions in its portfolio attributable to changes in market variables, such as general economic conditions, interest rates, foreign exchange rates, or the creditworthiness of the issuer of a financial instrument. This is a general risk that applies to all investments, meaning that the value of a particular investment may go down as well as up in response to changes in market variables.

Distributions are not guaranteed and may fluctuate. Past distributions are not necessarily indicative of future trends, which may be lower. Distribution payouts and its frequency are determined by the Board of Directors and should not be confused with the Fund's performance, rate of return or yield. Any payment of distributions may result in an immediate decrease in the net asset value per share. Please refer to Section 7.2 of the prospectus for dividend distribution policy.

For more information about charges, please see section 9 (fees and expenses) of the prospectus, which is available at : www.aia.com/en/funds-information

COMMENTARY

Global equities rose in October, marking a sixth consecutive monthly gain and reflecting robust AI infrastructure spending, strength in corporate earnings, and more accommodative U.S. Federal Reserve (Fed) policy. Mega-cap technology firms largely delivered solid earnings and projected sustained artificial intelligence (AI) investment, helping offset concerns over delayed U.S. economic data caused by the government shutdown. The Fed cut rates by 25 basis points and announced plans to end quantitative tightening, signaling a boost to liquidity. However, Fed Chair Jerome Powell cautioned against expectations of an additional rate cut in December, emphasizing the Fed's data-dependent stance.

U.S. President Donald Trump and Chinese President Xi Jinping held a productive meeting in South Korea, resulting in plans to lower China's overall tariff rate from 57% to 47% and a Chinese agreement to pause export controls on rare-earth metals and purchase large quantities of U.S. soybeans. In Japan, Sanae Takaichi was elected prime minister as the Liberal Democratic Party formed a minority coalition with the Japan Innovation Party, moving toward a parliamentary majority. Markets rallied on the prime minister's economic-security agenda, boosting Nuclear, Defense, and Tech stocks, while Japanese government bond yields climbed on expectations of a more expansionary fiscal agenda to boost economic growth. The yen weakened after the Bank of Japan refrained from raising interest rates and adopted a more hawkish tone amid Takaichi's accommodative fiscal and monetary policy stance.

The AIA Equity Income Fund underperformed its benchmark during the period, returning 1.84% compared to 2.24% for the MSCI All Country World Net Index.

At the Fund level, regional exposure to Japan and Emerging Markets detracted most from relative performance. From a sector perspective, exposure to the Information Technology and Consumer Staples sectors detracted most from relative performance, whilst exposure to the Financials and Consumer Discretionary sectors contributed.

From a strategy perspective, allocations to U.S. covered call writing and global low volatility income equities (ex U.S.) contributed positively to absolute performance.

The Fund's underweight exposure to Taiwan Semiconductor Manufacturing Company (TSMC) was one of the top detractors over the period. TSMC is a Taiwan-based multinational company and the world's largest contract chipmaker, specializing in advanced semiconductor manufacturing for high-performance computing, AI, and 5G applications, serving global clients such as Nvidia Corporation and AMD. Its shares rose over the period after reporting strong third-quarter results, with revenue up 39.1% year-over-year, driven by record demand for AI chips. Management noted that growing consumer adoption of AI models is fueling increased demand for computing power and, consequently, semiconductor products. The Fund remains underweight the stock in the portfolio.

The Fund's overweight exposure to General Motors was the top contributor to relative performance over the period. General Motors is a U.S.-based multinational automotive manufacturer that designs, builds, and sells cars, trucks, crossovers, and automobile parts worldwide. Shares of General Motors rose over the period. The automaker posted third-quarter earnings that beat Wall Street expectations, while raising its full-year guidance, projecting higher adjusted Earnings Before Interest and Taxes (EBIT), and lowered its expected tariff impact. The Fund remains overweight the stock in the portfolio.

From a positioning perspective, the Fund increased its underweight exposure to the HealthCare sector. It decreased its overweight to the Real Estate sector, which continues to be the largest overweight. The Fund also decreased its underweight exposure to the Information Technology sector, which continues to be the largest underweight.

With regards to regional positioning, the Fund decreased its overweight exposure to Japan. It increased its underweight exposure to North America, which continues to be the largest underweight. The Fund increased its overweight exposure to Emerging Markets during the month, which continues to be the largest overweight.

DISCLAIMER

*This document is exclusively for use by **Institutional Investors** as defined under Luxembourg laws and regulations and the Securities and Futures Act 2001 and is not to be used with or distributed directly or indirectly to the public and must not be reproduced, extracted or circulated without prior permission.

AIA Investment Funds ("**AIAIF**") is an open-ended investment company with variable capital registered in the Grand Duchy of Luxembourg, which qualifies as an Undertaking for Collective in Transferable Securities under relevant EU legislation. The management company of AIAIF is FundRock Management Company S.A.. AIAIF may not be registered in every jurisdiction and this document and any related materials may not be distributed or published in any jurisdiction where it would be contrary to local law or regulation.

This document is for information only and is not intended as an offer, a solicitation of offer or a recommendation, to deal in shares of securities or any financial instruments nor does it constitute any investment advice to anyone as it does not have regard to any specific investment objective, financial situation or particular needs. Subscriptions for shares of AIAIF can only be made on the basis of its current Prospectus and the Key Investor Information Document ("**KIID**") of the relevant sub-fund.

Investments in AIAIF are not obligations of, deposits in, guaranteed or insured by AIAIF nor any of its affiliates and are subject to investment risks, including the possible loss of the principal amount invested. **Prospective investors are invited to further consider the risk warnings section of the Prospectus and the relevant KIID.** This document is solely for information and does not have any regard to the specific investment objectives, financial or tax situation and the particular needs of any specific person who may receive this document. No investment strategy or risk management strategy techniques can guarantee returns or eliminate risks in any market environment.

Please refer to the offering documents (including, but not limited to the current Prospectus and the KIID) of AIAIF for details on fees and charges, dealing & redemption, product features, risk factors and seek professional advice before making any investment decision. The value of shares in any sub-fund of AIAIF and the income accruing to the shares, if any, may fall or rise. Where an investment is denominated in a currency other than the base currency of a sub-fund of AIAIF, exchange rates may have an adverse effect on the value price or income of that investment. Investors should not make any investment decision solely based on this document. In the event that an investor may choose not to seek advice from a financial adviser, the latter should consider carefully whether an investment into a sub-fund of AIAIF in question is suitable for him.

Past performance and the predictions, projections, or forecasts on the economy, securities markets or the economic trends of the markets are not necessarily indicative of the future or likely performance of the AIAIF.

Any sub-fund of AIAIF may use derivative instruments for efficient portfolio management and hedging purposes.

This paragraph is only applicable to the distribution share classes of AIAIF. AIAIF may, at its discretion, determine how the earnings of distribution share classes shall be distributed and may declare distributions from time to time. When AIAIF decides to pay dividends in respect of a distributing share class out of the capital of the sub-fund of AIAIF or where the dividends in respect of a distributing share class are paid out of gross income of the sub-fund of AIAIF, while the sub-fund of AIAIF's fees and expenses are charged to or paid out of the capital of the sub-fund of AIAIF, resulting in an increase in distributable income for the payment of dividends by the sub-fund of AIAIF, such payment of dividends may, in the light of the rules applicable in the jurisdictions where the sub-fund of AIAIF is registered for public distribution, be considered as a payment of dividends out of and effectively out of capital respectively, both of which would amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. The distributions, including amounts and frequency, are not guaranteed and are subject to the discretion of AIAIF. Past dividends are not a forecast or projection of future distributions.

There is no assurance that any securities discussed herein will remain in the portfolio in the future. All material is compiled from sources believed to be reliable and correct but accuracy cannot be guaranteed. No warranty of accuracy is given and no liability in respect or any error or omission is accepted nor liability for damages arising out of any person's reliance upon the information, opinion, forecast or estimate contained in this document.

The above is based on information available as of the date of this document, unless otherwise stated. Any information, opinion or view presented is subject to change and AIAIF reserves the right to make any amendments to the information at any time, without notice.
