AIA New Multinationals Fund a sub-fund of AIA Investment Funds

The Fund is managed by FundRock Management Company S.A. (the "Management Company")

### Objectives and Investment Policy

**Objective:** The Sub-Fund aims to generate long-term total returns through a concentrated portfolio of global equities and equity-related securities issued by companies which qualify as sustainable investment and whose management teams and boards display exemplary 'stewardship'. The Sub-Fund has a sustainable investment objective and must provide disclosure in accordance with Article 9 of the SFDR. The sustainable objective of the Sub-Fund is to contribute to climate change mitigation (by targeting net zero emissions by 2050 in alignment with the Paris Agreement and by investing in companies that have set carbon emission reduction targets or maintain lower carbon emissions relative to their industry average) and to invest in companies whose management teams and boards display exemplary 'stewardship'. Information relating to the sustainable investment objectives of this Sub-Fund is available in the SFDR disclosure in Prospectus. The Sub-Investment Manager will actively manage the Sub-Fund, seeking to outperform the MSCI All Country World Index in alpha terms and achieve the objectives, primarily (i.e., at least 90% of the Sub-Fund's Net Asset Value) through investment in equity securities and equity related securities issued by large-cap companies worldwide that meet the Sub-Fund's sustainable objective. The Sub-Fund will invest in equity, such as shares, preferred stocks, and other securities with equity characteristics, comprising listed as well as over-the-counter, depository receipts such as American Depository Receipts (ADRs), Global Depository Receipts (GDRs) and European Depository Receipts (EDRs), rights, warrants, units of Real Estate Investment Trusts (REITs), either directly or indirectly through financial derivative instruments.

The Sub-Fund may also invest in Initial Public Offering (IPOs) and secondary offerings.

The Sub-Fund may invest in market access products (comprising warrants on equities, options on equities and equity swaps) for securities issued by developed and emerging market companies.

The Sub-Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities of the U.S. Securities and Exchange Commission. Regulation S securities are those offered outside the United States of America without registration under the United States Securities Act of 1933 (as amended). Investments in Rule 144A securities shall not exceed 20% of the Net Asset Value of the Sub-Fund. The Sub-Fund will be diversified by industry and country, and the portfolio will be designed to ensure high liquidity with a relatively lower turnover.

The Sub-Fund will generally invest in developed countries, and may invest up to 20% of its net assets in countries, which are considered to be emerging markets or frontier markets.

The Sub-Fund may invest up to 20% of its net assets in convertible securities and preferred securities and may also invest directly up to 10% of its Net Asset Value in China A-Shares traded via Stock Connect.

**Policy:** The Sub-Fund may use financial derivative instruments, including OTC derivatives for hedging and efficient portfolio management purposes, including, but not limited to, equity index futures, rights, warrants, swaps, options, currency derivatives and other UCITS eligible derivatives. The Sub-Fund will not enter into (i) repurchase and reverse repurchase transactions, (ii) securities lending and securities borrowings, and (iii) total return swaps. The Sub-Fund may hold ancillary liquid assets. On a temporary basis, the Sub-Fund may, in order to take measures to mitigate risks relative to such exceptional market conditions in the best interests of the investors, hold ancillary liquid assets up to 100% of its Net Asset Value. In order to (i) achieve its investment goals, (ii) for treasury purposes, and/or (ii) in case of unfavourable market conditions, the Sub-Fund may hold cash equivalent (i.e., bank deposits excluding bank deposits at sight, money market instruments or money market funds) pursuant to the applicable investment restrictions.

The Sub-Fund may not invest in securities from an issuer in the tobacco industry or firms involved in the production of cluster munitions. The Sub-Fund shall further not directly hold or acquire securities from issuers which are coal mining and / or coal-fired power generation companies. The Sub-Fund is not permitted to invest in aggregate more than 10% of its Net Asset Value in shares or units of UCITS or other UC.

**Benchmark:** The Sub-Fund is actively managed. The Joint Investment Managers will therefore not track any index and/or have any constraints in relation to the allocation of the portfolio, based on the change in the composition of any index. Subject to the restrictions and exclusions above and in the SFDR disclosure in the Prospectus, the Sub-Fund may invest in equity securities and equity-related securities of companies of any market capitalisation, of any industry or sector and in any geography. Should investors in the Sub-Fund wish to measure the performance of the Sub-Fund for comparison purposes, then the Investment Manager would suggest using the MSCI AC World Index.

**Other Information:** Your shares will be non-distributing. Income from investments in the Sub-Fund will be re-invested and therefore rolled up into the value of your shares.

The Sub-Fund currency is USD. This Share Class is in USD.

You can buy and sell your shares daily. The minimum initial investment for this Share Class is USD 10,000,000 or currency equivalent.

**Recommendation:** The Sub-Fund is intended as a long term investment. Investors should consider their own personal circumstances and seek additional advice from their financial adviser or other professional adviser on their risk tolerance and investment horizon before investing in the Sub-Fund.

### Risk and Reward Profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time.

The lowest category does not mean a risk free investment.

The Sub-Fund is rated in this risk and reward category due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

**Emerging markets:** May face more economic, political or structural challenges than developed countries. This may mean your money is at greater risk. Other factors include greater "Liquidity Risk", restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Sub-Fund.

**Foreign Exchange and Currency Risk:** The Sub-Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.

**Equity risk:** Can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

**CAAP, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect risk:** The Sub-Fund may invest in China 'A' shares either via China-A Shares Access Products (CAAPs) and/or via the Shanghai-Hong Kong Stock Connect and/or via the Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

**Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Sub-Fund to financial loss.

**Derivatives Instruments:** Derivatives and other financial techniques used substantially to obtain, increase or reduce exposure to assets may be difficult to value, may generate leverage, and may not yield the anticipated results. All of this could be detrimental to the performance of the Sub-Fund.

**Hedging risk:** The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their shares.

**Market risk:** Is understood as the risk of loss for a Sub-Fund resulting from fluctuation in the market value of positions in its portfolio attributable to changes in market variables, such as general economic conditions, interest rates, foreign exchange rates, or the credit worthiness of the issuer of a financial instrument.

**Risks associated with Depository Receipts:** ADRs and GDRs do not always perform in line with the underlying security and there is no guarantee that a similar outcome will be achieved to that if it were possible to hold the securities directly. In the event of the suspension or closure of a market(s) on which the underlying securities are traded, there is a risk that the value of the ADR/GDR will not closely reflect the value of the relevant underlying securities. Additionally, there may be some circumstances where the Investment Manager cannot, or it is not appropriate to, invest in an ADR or GDR, or the characteristics of the ADR or GDR do not exactly reflect the underlying security.

**Sustainability Risk:** It is principally linked to climate-related events resulting from climate change (physical risks) or to the society's response to climate change (transition risks), which may result in unanticipated losses that could affect a Sub-Fund's investments and financial condition. Social events (e.g., inequality, inclusiveness, labour relations, investment in human capital, accident prevention, changing customer behaviour, etc.) or governance shortcomings (e.g., recurrent significant breach of international agreements, bribery issues, products quality and safety, selling practices, etc.) may also translate into Sustainability Risks.
