## AIA Investment Funds – AIA Global Corporate Bond Fund – CLASS I USD

### A Share Class of AIA Global Corporate Bond Fund

### A Sub-Fund of AIA Investment Fund, the “UCITS”

ISIN code: LU2991889739

This UCITS has appointed FundRock Management Company S.A. as its Management Company

## Objectives and investment Policy

The Sub-Fund aims to provide a combination of capital growth and income that is higher than the Bloomberg Global Aggregate Corporate Index over any five-year period. In order to achieve its investment objective, at least 80% of the Sub-Fund's Net Asset Value is invested directly in investment grade corporate bonds (BBB- or above rated by Standard & Poor's, Baa3 or above by Moody's, and BBB- or above by Fitch, or an equivalent rating from an internationally recognised rating agency), denominated in any currency, including investment grade asset-backed securities. These securities may be issued by companies that are domiciled in any country, including emerging markets. The Sub-Fund may invest up to 20% of its Net Asset Value, directly or via collective investment schemes, in (i) below investment grade securities (BB+ or below rated by Standard & Poor's, Ba1 or below by Moody's, and BB+ or below by Fitch, or an equivalent rating from an internationally recognised rating agency), including corporate bonds, bonds issued or guaranteed by governments and their agencies, public authorities, quasi-sovereigns and supranational bodies; asset-backed securities and (ii) unrated debt securities which have been assessed, to be of good credit quality based on the Investment Manager's internal credit assessment framework. The Sub-Fund will not invest in distressed or default securities (rated CCC+ (or equivalent) or below). In case of a downgrade of a security to distressed or default (rated “CCC+” (or equivalent) or below), the Investment Manager may (i) sell a part or the entire amount of security held or (ii) terminate the transaction entered into, at its discretion. Investments in asset-backed securities and/or contingent convertible bonds are limited to 20% of the Sub-Fund. The Sub-Fund may use financial derivative instruments including OTC derivatives for hedging and efficient portfolio management purposes only. The Sub-Fund is globally diversified and seeks to provide exposure to a broad range of issuers across a variety of sectors. The Sub-Fund may hold ancillary liquid assets. On a temporary basis, the

Sub-Fund may, in order to take measures to mitigate risks relative to such exceptional market conditions in the best interests of the investors, hold ancillary liquid assets up to 100% of its Net Asset Value. In order to (i) achieve its investment goals, (ii) for treasury purposes, and/or (iii) in case of unfavourable market conditions, the Sub-Fund may hold cash equivalent (i.e., bank deposits excluding bank deposits at sight, money market instruments or money market funds) pursuant to the applicable investment restrictions.

The Sub-Fund may not invest in securities from an issuer in the tobacco industry or firms involved in the production of cluster munitions. The Sub-Fund shall further not directly hold or acquire securities from issuers which are coal mining and/or coal-fired power generation companies. The Sub-Fund is not permitted to invest in aggregate more than 10% of its Net Asset Value in shares or units of UCITS or other UCI, including exchange-traded funds. The Sub-Fund may invest in fixed income securities of any issuer, of any industry or sector and in any geography.

The Sub-Fund is actively managed. The Investment Manager will therefore not track any index and/or have any constraints in relation to the allocation of the portfolio, based on the change in the composition of any index. Should investors in the Sub-Fund wish to measure the performance of the Sub-Fund for comparison purposes, then the Investment Manager would suggest using Bloomberg Global Aggregate Corporate Index.

Your shares will be non-distributing. Income from investments in the Sub-Fund will be re-invested and therefore rolled up into the value of your shares. The Sub-Fund currency is USD. This Share Class is in USD. You can buy and sell your shares daily. The minimum initial investment for this Share Class is USD 10,000,000 or currency equivalent.

**Recommendation:** The Sub-Fund is intended for investors seeking potential capital growth in the relative stability of the debt markets over the long-term. Investors should consider their own personal circumstances and seek additional advice from their financial adviser or other professional adviser on their risk tolerance and investment horizon before investing in the Sub-Fund.

## Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time. The lowest category does not mean a risk free investment.

The Sub-Fund is rated X due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

- **Emerging markets:** may face more economic, political or structural challenges than developed countries. This may mean your money is at greater risk. Other factors include greater "Liquidity Risk", restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Sub-Fund
- **Derivatives Instruments:** Derivatives and other financial techniques used substantially to obtain, increase or reduce exposure to assets may be difficult to value, may generate leverage, and may not yield the anticipated results. All of this could be detrimental to the performance of the Sub-Fund.
- **Credit risk:** The risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the sub-fund holds low-rated, non-investment-grade securities.

• **Hedging risk:** The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their shares.

• **Fixed Income Transferable Securities:** Debt securities are subject to both actual and perceived measures of creditworthiness. The "downgrading" of a rated debt security or its issuer or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security.

• **Interest Rate Risk:** The performance of a Sub-Fund may be influenced by changes in the general level of interest rates.

• **Sovereign debt risk:** Sovereign debt refers to debt obligations issued or guaranteed by governments or their agencies and instrumentalities (each a "governmental" entity). Investments in sovereign debt may involve a degree of risk

• **Bond Downgrade Risk:** A Sub-Fund may invest in highly rated / investment grade bonds, however, where a bond is subsequently downgraded it may continue to be held in order to avoid a distressed sale. To the extent that a Sub-Fund does hold such downgraded bonds, there will be an increased risk of default.

• **Investment grade bonds risk:** Certain Sub-Funds' investment objective is to invest in investment grade bonds where there is a risk that the rating of the bonds held by the Sub-Funds may be downgraded at any time. In the event of such downgrading, the value of the Sub-Funds may be adversely affected.

• **Sustainability Risk:** It's principally linked to climate-related events resulting from climate change (physical risks) or to the society's response to climate change (transition risks), which may result in unanticipated losses that could affect a Sub-Fund's investments and financial condition. Social events (e.g., inequality, inclusiveness, labour relations, investment in human capital, accident prevention, changing customer behaviour, etc.) or governance shortcomings (e.g., recurrent significant breach of international agreements, bribery issues, products quality and safety, selling practices, etc.) may also translate into Sustainability Risks.
