Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

AIA INVESTMENT FUNDS - AIA GLOBAL EQUITY ADVANTAGEFUND - CLASS Z USD; ISIN: LU3379667051

AIA Global Equity Advantage Fund a sub-fund of AIA Investment Funds

The Fund is managed by FundRock Management Company S.A. (the "Management Company")

Objectives and Investment Policy

Objective: The Sub-Fund seeks to achieve long-term capital appreciation through a portfolio of equities and equity-related securities issued in developed market.

Policy: The Sub-Fund will invest at least 80% of its Net Asset Value in listed equity and equity-related securities of or relating to companies of any capitalization and industry, from around the world globally, in developed markets.

Such securities may include, without limitation, common shares, preference shares, warrants (instruments giving the holder the right to buy shares at a predetermined price during a set period), rights issues (entitlements granted to existing shareholders to purchase new shares, usually at a discounted price) and American Depository Receipts (ADRs) and Global Depository Receipts (GDRs) (exchange-listed instruments representing shares in foreign companies). In addition, and for up to 10% of the Sub-Fund's Net Asset Value, the Sub-Fund may invest in eligible Real Estate Investment Trusts (REITs).

The Sub-Fund uses a computer-driven, systematic process to select stocks from a broad global universe, filtering first for size, data quality and tradability to build an investable list. Each stock is then scored daily across four key dimensions – growth prospects, valuation attractiveness, market sentiment, and financial strength – and ranked accordingly, so that the portfolio consistently targets companies offering the best combination of these characteristics.

The Sub-Fund excludes investments in securities from issuers active in tobacco manufacturing, cluster munitions production, or coal (mining and/or power generation). These sectoral exclusions do not constitute the promotion of environmental or social characteristics under Article 8 SFDR; they solely aim to preserve the Sub-Fund's risk-adjusted returns over the long term.

Benchmark: The Sub-Fund is actively managed. The Investment Managers will therefore not track any index and/or have any constraints in relation to the allocation of the portfolio, based on the change in the composition of any index. Should investors in the Sub-Fund wish to measure the performance of the Sub-Fund for comparison purposes, then the Investment Manager would suggest using the MSCI World Index.

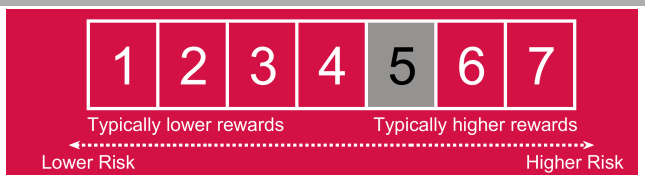

Other Information: Your shares will be non-distributing. Income from investments in the Sub-Fund will be re-invested and therefore rolled up into the value of your shares.

The Sub-Fund currency is USD. This Share Class is in USD.

You can buy and sell your shares daily. The minimum initial investment for this Share Class is USD 20,000,000 or currency equivalent.

Recommendation: The Sub-Fund is suitable for investors who are seeking exposure to growth investments over the long-term. Investors should consider their own personal circumstances and seek additional advice from their financial adviser or other professional adviser on their risk tolerance and investment horizon before investing in the Sub-Fund.

Risk and Reward Profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time.

The lowest category does not mean a risk free investment.

The Sub-Fund is rated in this risk and reward category due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

Foreign Exchange and Currency Risk: The Sub-Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.

Equity Risk: Can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

Liquidity Risk: In difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.

Market Risk: is understood as the risk of loss for a Sub-Fund resulting from fluctuation in the market value of positions in its portfolio attributable to changes in market variables, such as general economic conditions, interest rates, foreign exchange rates, or the creditworthiness of the issuer of a financial instrument.

Sustainability Risk: It is principally linked to climate-related events resulting from climate change (physical risks) or to the society's response to climate change (transition risks), which may result in unanticipated losses that could affect a Sub-Fund's investments and financial condition. Social events (e.g., inequality, inclusiveness, labour relations, investment in human capital, accident prevention, changing customer behaviour, etc.) or governance shortcomings (e.g., recurrent significant breach of international agreements, bribery issues, products quality and safety, selling practices, etc.) may also translate into Sustainability Risks.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	Entry charge	5%
	Exit charge	1%
Charges taken from the Fund over a year	Ongoing charges	0.07%
Charges taken from the Fund under certain specific conditions	Performance fee	None

The **entry** and **exit charges** shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on an estimate calculated during the launch phase. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

For more information about charges, please see section charges and expenses of the prospectus of the UCITS, which is available at:www.aia.com/en/funds-information.
