INVESTMENT OBJECTIVE AND STRATEGY

The fund aims to provide liquidity and stable income by investing in peso-denominated money market and fixed-income instruments with remaining terms to maturity of not more than three (3) years and has a weighted average portfolio life of one (1) year or less. The fund will track the performance of the Markit iBoxx ALBI Money Market or IBXXCHOG Index by replicating the characteristics of the benchmark.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

This fund is suited for conservative investors with an investment horizon no more than one (1) year.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Credit Risk.** Refers to the risk of losses that an investor is exposed to due to a borrower’s failure to pay the principal and/or interest on instruments such as bonds, loans, or other forms of securities. The borrower’s inability to fulfil its financial obligations may be due to adverse changes in its financial condition thus, lowering the credit quality and/or price of the security.
- Counterparty Risk.** Refers to the risk of a counterparty defaulting on a contract to deliver its obligation in cash, securities or even services.
- Liquidity Risk.** Refers to the risk of losses that an investor is exposed to due to the inability to convert assets into cash immediately or when the conversion is possible but only at a lower price. Such may be caused by holding securities with small or few outstanding issues, inadequate buyers, infrequent trading activity or underdeveloped capital market.
- Market Risk.** Refers to the risk of losses that an investor is exposed to due to the unanticipated change in the prices of securities or macroeconomic variables that influence the financial markets.
- Interest Rate Risk.** Refers to the risk of loss that an investor is exposed to due to changes in interest rates. The purchase and sale of fixed income securities, for example, may result in a loss because the price of the security may decline if interest rates rise.
- Reinvestment Risk.** Refers to the risk that an investor is exposed to the possibility of getting lower returns or earnings upon reinvestment of maturing funds and/or interest earnings.

- THE UITF IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP (PDIC).
- RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/ FLUCTUATIONS ONLY.
- WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.
- THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

NAVPU GRAPH

* Effective May 01, 2024 - new benchmark is Markit iBoxx ALBI Philippines Money Market [IBXXCHOG INDEX] from Bloomberg Philippine Sovereign Bond Index Money Market [BPHILMM INDEX]. The IBXXCHOG Index reflects acceptable returns on a peso-denominated low risk fixed income portfolio comprising of fixed-income securities with remaining maturity of three (3) months to one (1) year. Relative to the previous benchmark, it is net of taxes, which is a more accurate measure of performance.

PORTFOLIO COMPOSITION

BENCHMARK INFORMATION

Markit iBoxx ALBI Philippines Money Market Index contains all Philippine government bonds and Treasury bills with a remaining maturity of between 3 months and 1 year, and a minimum notional size of Php 3 billion. Said benchmark is used to compare the performance of the Fund and complements the Fund's average weighted life of 1 year or less. For more information on this benchmark, please visit: [iBoxx® Bond & Loan Indices](#) or <https://www.markit.com/Company/Files/DownloadFiles?CMSID=65e492c01c0b41f7b02826405970c075>.

RELATED PARTY TRANSACTIONS

None to disclose.

OUTLOOK AND STRATEGY

In Q2 2025, Philippine inflation fell to multi-year lows, highlighting the diverging monetary policies of the BSP and the US Fed amid global uncertainty.

Headline inflation fell well below the BSP's 2%–4% target range, registering at 1.8% year-on-year in April, 1.4% in May, and 1.3% in June. This downtrend was largely attributed to easing rice prices and stable energy costs. In response, the BSP implemented a cumulative 50-basis-point rate cut, lowering its policy rate to 5.25% in an effort to support domestic growth. Meanwhile, the US Federal Reserve kept rates unchanged, adopting a cautious stance amid uncertainty. This followed delayed tariff announcements and rising geopolitical tensions—especially between Israel and Iran—which kept global bond markets on edge throughout the quarter.

Peso bond yields ended Q2 mixed, with a steeper curve and benchmark rates closing at:

- 5.72% for the 2-year (-3 bps),
- 5.94% for the 5-year (+4 bps),
- 6.28% for the 10-year (+8 bps), and
- 6.59% for the 20-year (+27 bps).

BSP monetary policy easing would provide a positive backdrop for bonds. However, US trade policy and geopolitical shifts may drive near-term volatility. The fund will maintain a neutral to slightly overweight stance to benefit from easing while safeguarding capital and liquidity.
