Enduring growth and making a difference are considered equally within the investment process as it is considered that both are mutually beneficial and reinforcing. Through the application of its investment process and ongoing monitoring, the Sub-Investment Manager ensures that at least 90% of the Sub-Fund's Net Asset Value is invested in companies which meets at least one of the Sub-Fund's sustainability themes (i.e., "People", "Planet" or "Prosperity"). The Investment manager will adopt a long term investment horizon and will look at indicators such as the long term strategic direction and culture of a company, capital allocation, skill of the management team and their level of alignment with shareholders to identify companies which in their opinion is running the business for the long term. On a temporary basis, the Sub-Fund may, in order to take measures to mitigate risks relative to such exceptional market conditions in the best interests of the investors, hold ancillary liquid assets up to 100% of its Net Asset Value. In order to (i) achieve its investment goals, (ii) for treasury purposes, and/or (ii) in case of unfavourable market conditions, the Sub-Fund may hold cash equivalent (i.e., bank deposits excluding bank deposits at sight, money market instruments or money market funds) pursuant to the applicable investment restrictions. The Sub-Fund may not invest in securities from an issuer in the tobacco industry or firms involved in the production of cluster munitions. Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time. The lowest category does not mean a risk free investment.

The Sub-Fund is rated 7 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

- **Emerging markets:** may face more economic, political or structural challenges than developed countries. This may mean your money is at greater risk. Other factors include greater "Liquidity Risk", restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Sub-Fund.
- **Foreign Exchange and Currency Risk:** The Sub-Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- **Equity risk:** can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- **CAAP, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock**

Connect risk: The Sub-Fund may invest in China 'A' shares either via China-A Shares Access Products (CAAPs) and/or via the Shanghai-Hong Kong Stock Connect and/or via the Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

• **Liquidity Risk:** In difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.

• **Market risk:** is understood as the risk of loss for a Sub-Fund resulting from fluctuation in the market value of positions in its portfolio attributable to changes in market variables, such as general economic conditions, interest rates, foreign exchange rates, or the creditworthiness of the issuer of a financial instrument.

• **Risks associated with Depositary Receipts:** ADRs and GDRs do not always perform in line with the underlying security and there is no guarantee that a similar outcome will be achieved to that if it were possible to hold the securities directly. In the event of the suspension or closure of a market(s) on which the underlying securities are traded, there is a risk that the value of the ADR/GDR will not closely reflect the value of the relevant underlying securities. Additionally, there may be some circumstances where the Investment Manager cannot, or it is not appropriate to, invest in an ADR or GDR, or the characteristics of the ADR or GDR do not exactly reflect the underlying security.

• **Sustainability Risk:** It's principally linked to climate-related events resulting from climate change (physical risks) or to the society's response to climate change (transition risks), which may result in unanticipated losses that could affect a Sub-Fund's investments and financial condition. Social events (e.g., inequality, inclusiveness, labour relations, investment in human capital, accident prevention, changing customer behaviour, etc.) or governance shortcomings (e.g., recurrent significant breach of international agreements, bribery issues, products quality and safety, selling practices, etc.) may also translate into Sustainability Risks.
