The Sub-Fund can invest in securities issued by issuers domiciled outside of the US as long as they are denominated in USD. The Sub-Fund will primarily invest in securities rated investment grade (BBB- or above rated by Standard & Poor's, Baa3 or above by Moody's and BBB- or above by Fitch or an equivalent rating from an internationally recognised rating agency) and non-investment grade securities shall not exceed 20% of the net assets of the Sub-Fund. Under normal circumstances, it is generally expected that the principal amount of such transactions will not exceed 30% of the Net Asset Value and remain within the range of 0% to 30% of the Net Asset Value. In certain circumstances this proportion may be higher. The Sub-Fund may incur

fees and transaction costs upon entering into such techniques and instruments. The Sub-Fund will not enter into (i) repurchase and reverse repurchase transactions, (ii) commodities lending and securities or commodities borrowings, (iii) buy-sell back or sell-buy back transactions, (iv) margin lending transactions and (v) total return swaps. Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time.

The lowest category does not mean a risk free investment.

The Sub-Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

- **Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Sub-Fund to financial loss.
- **Credit risk:** The risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the sub-fund holds low-rated, non-investment-grade securities.
- **Derivatives Instruments:** Derivatives and other financial techniques used substantially to obtain, increase or reduce exposure to assets may be difficult to value, may generate leverage, and may not yield the anticipated results. All of this could be detrimental to the performance of the Sub-Fund.

- **Hedging risk:** The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their shares .
- **Fixed Income Transferable Securities:** Debt securities are subject to both actual and perceived measures of creditworthiness. The “downgrading” of a rated debt security or its issuer or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security
- **Interest Rate Risk:** The performance of a Sub-Fund may be influenced by changes in the general level of interest rates.
- **Bond Downgrade Risk:** A Sub-Fund may invest in highly rated / investment grade bonds, however, where a bond is subsequently downgraded it may continue to be held in order to avoid a distressed sale. To the extent that a Sub-Fund does hold such downgraded bonds, there will be an increased risk of default.
- **Investment grade bonds risk:** Certain Sub-Funds' investment objective is to invest in investment grade bonds where there is a risk that the rating of the bonds held by the Sub-Funds may be downgraded at any time. In the event of such downgrading, the value of the Sub-Funds may be adversely affected.
- **ABS/MBS Risk:** The Sub-Fund may invest in asset-backed securities (“ABS”), including mortgage-backed securities (“MBS”), which are debt securities based on a pool of assets or collateralised by the cash flows from a specific pool of underlying assets. ABS and MBS assets may be highly illiquid, and therefore prone to substantial price volatility.
