Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time.

The lowest category does not mean a risk free investment.

The Sub-Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

- **Liquidity Risk:** In difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.
- **Credit risk:** The risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the sub-fund holds low-rated, non-investment-grade securities.

■ **Fixed Income Transferable Securities:** Debt securities are subject to both actual and perceived measures of creditworthiness. The “downgrading” of a rated debt security or its issuer or adverse publicity and investor perception, which may not be based on fundamental analysis, could decrease the value and liquidity of the security

■ **Distressed debt securities:** A Sub-Fund may invest in distressed debt securities. These assets involve a high risk of capital loss, uncertainty of interest payments and can suffer from poor liquidity.

■ **Interest Rate Risk:** The performance of a Sub-Fund may be influenced by changes in the general level of interest rates.

■ **Bond Downgrade Risk:** A Sub-Fund may invest in highly rated / investment grade bonds, however, where a bond is subsequently downgraded it may continue to be held in order to avoid a distressed sale. To the extent that a Sub-Fund does hold such downgraded bonds, there will be an increased risk of default.

■ **Risks associated with Depositary Receipts:** ADRs and GDRs do not always perform in line with the underlying security and there is no guarantee that a similar outcome will be achieved to that if it were possible to hold the securities directly. In the event of the suspension or closure of a market(s) on which the underlying securities are traded, there is a risk that the value of the ADR/GDR will not closely reflect the value of the relevant underlying securities. Additionally, there may be some circumstances where the Investment Manager cannot, or it is not appropriate to, invest in an ADR or GDR, or the characteristics of the ADR or GDR do not exactly reflect the underlying security.
