Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time.

The lowest category does not mean a risk free investment.

The Sub-Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

- **Emerging markets** may face more economic, political or structural challenges than developed countries. This may mean your money is at greater risk. Other factors include greater "Liquidity Risk", restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Sub-Fund.
- **Foreign Exchange and Currency Risk:** The Sub-Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- **Equity risk** can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

- **CAAP, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect risk:** The Sub-Fund may invest in China 'A' shares either via China-A Shares Access Products (CAAPs) and/or via the Shanghai-Hong Kong Stock Connect and/or via the Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.
- **Liquidity Risk:** In difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.
- **Market risk:** is understood as the risk of loss for a Sub-Fund resulting from fluctuation in the market value of positions in its portfolio attributable to changes in market variables, such as general economic conditions, interest rates, foreign exchange rates, or the creditworthiness of the issuer of a financial instrument.
- **Risks associated with Depository Receipts:** ADRs and GDRs do not always perform in line with the underlying security and there is no guarantee that a similar outcome will be achieved to that if it were possible to hold the securities directly. In the event of the suspension or closure of a market(s) on which the underlying securities are traded, there is a risk that the value of the ADR/GDR will not closely reflect the value of the relevant underlying securities. Additionally, there may be some circumstances where the Investment Manager cannot, or it is not appropriate to, invest in an ADR or GDR, or the characteristics of the ADR or GDR do not exactly reflect the underlying security.
