Objectives and investment policy

Objective:

The Sub-Fund aims to provide long-term capital growth through a portfolio of global equities and equity-related securities issued by companies worldwide.

Investment policy and specific restrictions:

- In order to achieve its investment objective, the Sub-Fund will invest primarily, i.e. at least 50% of the Sub-Fund's Net Asset Value, in equity securities and equity-related securities including, but not limited to, common shares, preference shares, warrants (including but not limited to access warrants), rights issues, REITs, convertible preferred stock and depository receipts (such as American Depository Receipts (ADRs) and Global Depository Receipts (GDRs)). Instruments received as a result of corporate actions are also permitted.
- The Fund may invest up to 10% of its assets in non-convertible debt securities rated Baa1 or below and BBB+ or below by a Credit Rating Agencies and Nationally Recognized Statistical Rating Organizations ("NRSROs") designated by the Sub-Investment Manager or unrated but determined by the Sub-Investment Manager to be of equivalent quality.
- The Fund may invest up to 5% of its assets in non-convertible debt securities rated Ba1 or below and BB+ or below by NRSROs designated by the Sub-Investment Manager or unrated but determined by the Sub-Investment Manager to be of equivalent quality. The Sub-Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund.
- The Sub-Fund may also invest in Initial Public Offerings (IPOs), secondary offerings and private placements.

- The Sub-Fund may not invest in securities from an issuer in the coal, tobacco industry or firms involved in the production of cluster munitions.
- The Sub-Fund may use financial derivative instruments for hedging and efficient portfolio management purposes only. The Sub-Fund may also retain amounts in cash or cash equivalents.
- The Sub-Fund is not permitted to invest in aggregate more than 10% of its Net Asset Value in shares or units of UCITS or other UCI.

• The Sub-Fund is actively managed. The Investment Manager will therefore not track any index and/or have any constraints in relation to the allocation of the portfolio, based on the change in the composition of any index. Should investors in the Sub-Fund wish to measure the performance of the Sub-Fund for comparison purposes, then the Investment Manager would suggest using the MSCI All Country World Index with net dividends reinvested.

Your shares will be non-distributing. Income from investments in the Sub-Fund will be re-invested and therefore rolled up into the value of your shares.

The Sub-Fund currency is USD. This Share Class is in USD.

You can buy and sell your shares daily. The minimum initial investment for this Share Class is USD 10,000,000 or currency equivalent.

Recommendation: The Sub-Fund is intended as a long term investment. Investors should consider their own personal circumstances and seek additional advice from their financial adviser or other professional adviser on their risk tolerance and investment horizon before investing in the Sub-Fund.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed and may change over time.

The lowest category does not mean a risk free investment.

The Sub-Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Sub-Fund's investments or expose the Sub-Fund to losses.

Particular risks not adequately captured by the risk indicator include:

- **Emerging markets** may face more economic, political or structural challenges than developed countries. This may mean your money is at greater risk. Other factors include greater "Liquidity Risk", restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Sub-Fund.
- **Equity risk** can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- **Liquidity Risk:** In difficult market conditions, the Sub-Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Sub-Fund to defer or suspend redemptions of its shares.
- **Stock Connect Risk:** The Sub-Fund may invest in China 'A' shares either via China-A Shares Access Products (CAAPs) and/or via the Shanghai-Hong Kong Stock Connect and/or via the Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.
- **Investments in the PRC Risk:** The Sub-fund may invest in china 'A' shares either via China-A shares access products (CAAPs) and/or via the shanghai-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.
- **Credit risk:** The risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the sub-fund holds low-rated, non-investment-grade securities.
- **Contingent convertible bonds:** Contingent convertible bonds can be automatically convert into shares or be written down if the financial strength of the issuer falls in a certain way. This may result in substantial or total losses of the bond value.
- **Small Capitalization Risk:** The stock of small-capitalisation/ mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.
- **Sustainability Risk:** Sustainability Risk is principally linked to climate-related events resulting from climate change (physical risks) or to the society's response to climate change (transition risks), which may result in unanticipated losses that could affect a Sub-Fund's investments and financial condition. Social events (e.g., inequality, inclusiveness, labour relations, investment in human capital, accident prevention, changing customer behavior, etc.) or governance shortcomings (e.g., recurrent significant breach of international agreements, bribery issues, products quality and safety, selling practices, etc.) may also translate into Sustainability Risks.
- **Derivatives Instruments:** Derivatives and other financial techniques used substantially to obtain, increase or reduce exposure to assets may be difficult to value, may generate leverage, and may not yield the anticipated results. All of this could be detrimental to the performance of the Sub-Fund.
- **Hedging risk:** The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their shares .
- **Bond Downgrade Risk:** A Sub-Fund may invest in highly rated / investment grade bonds, however, where a bond is subsequently downgraded it may continue to be held in order to avoid a distressed sale. To the extent that a Sub-Fund does hold such downgraded bonds, there will be an increased risk of default.
- **Market risk:** is understood as the risk of loss for a Sub-Fund resulting from fluctuation in the market value of positions in its portfolio attributable to changes in market variables, such as general economic conditions, interest rates, foreign exchange rates, or the creditworthiness of the issuer of a financial instrument.
